Marian Veteanu

Chief Software Architect and Engineering Leader | Cloud-Native SaaS & AI Platforms | Scale, Strategy, Delivery

+1 (954) 328-3760 | mveteanu@gmail.com | https://mveteanu.me | https://linkedin.com/in/mveteanu/

Chief Software Architect and Engineering leader with 20+ years in healthcare and regulated industries, building scalable SaaS and AI platforms using modern cloud-native technologies. Directed $10M+ transformations. Influenced C-suite leadership to build an AI-powered UI modernization tool and modernization strategy proven to save ~$200M over a decade. Recognized thought leader in Generative AI (LLMs, RAG, AI-native architecture).

PROFESSIONAL EXPERIENCE

FPFX Tech — 2026 – present

Director of Development

- Oversaw several engineering teams (USA & remote), driving platform architecture and multi-cloud infrastructure strategy (Azure, Digital Ocean, Hetzner) and establishing development processes and technical standards.
- Defined and implemented the company's AI strategy, launching a new line of AI-first products built around agentic AI and introducing agentic engineering practices to improve developer productivity.

CodeGuppy & AppMaker.io — 2024 – 2026

Founder & CTO

- Founded and scaled CodeGuppy.com, an EdTech SaaS platform with **41K+ global users**, balancing cost optimization and performance.
- Architected and developed AppMaker.io, a full-stack, AI-enabled application development platform combining visual development and AI-assisted code generation to accelerate delivery of internal / business apps.
- Led end-to-end product and platform architecture across both ventures, leveraging Google Cloud Platform (GCP), cloud-native technologies, and modern software engineering practices.
- Built a strong **thought leadership presence** by publishing articles on **AI integration**, **cloud-native architecture**, and **platform engineering**, engaging an audience of **7K+ LinkedIn followers**.
- Provided consultancy on **GenAI** and growing strategy to early stage startups, advising on **agentic AI architecture**, **LLMs**, **RAG**, **MCP, LLM security (OWASP top 10 for LLMs)**, and **Azure cloud-native architecture** including orchestration (Temporal, Azure Durable Functions) for scalable AI-enabled systems.

Abbott Laboratories/STARLIMS — 2003 – 2024

Head of Technology Platform Architecture & Strategy (2021 – 2024)

(HR Titles: Sr. Software Research Manager / Sr. Technical Product Manager)

- **Directed architecture strategy across 300+ engineers** — **aligning roadmap** with business goals.
- Drove cross-functional adoption of the STARLIMS Platform and REST **API strategy** to accelerate time-to-value and secure **multimillion-dollar Fortune 500 contracts**.
- Redefined **data analytics strategy** by migrating from **Tableau to Qlik**, cutting costs 50% and improving performance.
- Embedded secure-by-design principles and **OWASP Top 10** controls into CI/CD workflows, and coordinated regular **penetration testings**.
- **Pioneered AI-driven digital transformation**, embedding Azure AI and LLM/RAG capabilities into STARLIMS' SaaS strategy.

Head of NextGen Platform Architecture *(Sr. Research Manager)* ***(2020 – 2021)***

- Designed a distributed, **event-driven SaaS platform** using React, .NET/C#, Kubernetes, and **microservices** / micro front-ends on **Azure and AWS** that enabled 10x scalability.
- **Influenced executive stakeholders (C-suite level)** by presenting architecture strategies, and trade-offs
- Built the **business case for corporate funding**, highlighting shortcomings of the legacy platform, and demonstrating the need for a new NextGen solution.
- Led team to **develop the NextGen MVP and TCO** to **secure corporate funding**, balancing engineering capacity, vendor spend, and infrastructure costs.
- Facilitated estimation and scope workshops with **engineering, product, and stakeholders**
- Standardized project governance practices (execution metrics, milestone tracking, risk management)

Software Engineering Manager, Senior – Multi-Product Architecture (2018 – 2021)

- **Guided architecture and technical roadmaps** across four core product lines
- Drove **platform modernization initiatives** (e.g., cloud migration, API strategy (REST, GraphQL), enterprise integrations, Docker / Kubernetes, React)
- **Led engineering teams** to deliver releases on time and with high quality, balancing innovation with business commitments.
- **Influenced C-suite leadership** to build an AI-powered UI modernization tool that proved capable of **reducing project costs** by **~$7.2M** over two years and **~$200M** over a decade across 500+ services projects.
- Adopted an agile **SDLC** for medical device software (**healthcare regulated industry**), ensuring compliance with regulatory standards and alignment with business strategy.

- Defined **multi-year platform vision and strategy**, partnering with product and executive leadership
- **Mentored and developed engineering leaders and senior ICs**, fostering a culture of technical excellence, ownership, and career growth.
- Introduced **agile-at-scale** practices and **modern CI/CD pipelines** with automated unit testing.
- Oversaw **system security, compliance, and reliability** standards across product lines
- Monitored delivery performance and KPIs

Software Engineering Manager, Platform Architecture (2010 – 2018)

- **Directed $10M+ digital transformation** of STARLIMS, migrating from legacy RIA/XFD to a **micro front-end React HTML5 & .NET / C# services platform**, improving load times by 400% and increasing solution sales by 120%.
- Directed **vendor strategy** for 20+ technology platform components, selecting **strategic partners**, reviewing **licensing models**, and overseeing renewals to **optimize cost**, **compliance**, and long-term **scalability**.
- Defined and drove the **technical vision** for STARLIMS' core platform, **aligning architecture** with business strategy and securing **executive stakeholder alignment**.
- **Established strategic partnership with Microsoft** to validate **engineering strategy**.
- Integrated **regulatory compliance** (ISO 13485, Section 508C, 21 CFR Part 11) into engineering workflows

Principal Application Architect (2003 – 2010)

- **Led a major modernization** of STARLIMS architecture, transitioning from a legacy client-server model to a scalable, web-based enterprise platform, **partnering with executive leadership** on strategy and delivery to enable adoption across **Fortune 500 clients**.
- **Architected** the STARLIMS v10 Core Technology Platform, spearheading adoption of the .NET/C# Microsoft technology stack and **leading the engineering team** in delivering a **scalable stateless platform**
- **Invented and built** the XFD Framework - similar to Microsoft XAML, enabling responsive, browser-based UIs with a desktop-like experience (https://en.wikipedia.org/wiki/User_interface_markup_language#XFD).
- **Spearheaded DevOps enablement**, developing build automation and scripted deployment pipelines to streamline release processes.

VMASOFT — 2001 – 2003

Founder & Software Architect

- Founded VMASOFT and architected PowerTests.NET, a web based EdTech platform.

ARCHITECTURE LEADERSHIP

Enterprise & Solution Architecture Strategy

Mentorship of Architects & Engineering Leaders

Engineering OKRs & Metrics-Driven Performance

Governance, Standards & Compliance by Design

AI-Native Architecture (LLMs, RAG, MCP)

AI-Driven Product Innovation

API-First Architecture & Developer Experience

Document Intelligence

Entrepreneurial Thinking & Innovation Initiative

Thought Leadership

Developer Community Engagement & Cloud Advocacy

TECHNICAL SKILLS

Languages/Frameworks: .NET / C#, JavaScript, TypeScript, Python, NodeJS, SQL (SQL Server, Oracle, MySQL, PostgreSQL) / NoSQL (Firebase, MongoDB, Cosmos DB), React, etc.

Cloud & Infrastructure: AWS, Azure, GCP, Docker, Kubernetes, CI/CD Pipelines, Infrastructure as Code(IaC)

Architecture: Distributed Systems, Scalable System Architecture, Microservices, Micro Frontends, API Design (REST, GraphQL, gRPC), Event-driven Systems, Enterprise Integration Patterns, Cloud-Native Architecture, Messaging & Streaming (RabbitMQ, Kafka)

Workflow Orchestration: Microservices (Temporal, Camunda, Azure Durable Functions), Zapier, n8n, Scitara

Data Analytics & BI: Big Data (Snowflake), Tableau, Qlik, Power BI

Monitoring & Tooling: Grafana, Azure DevOps, Datadog, New Relic

AI: Large Language Model (LLM), Retrieval-Augmented Generation (RAG), Generative AI frameworks & APIs (Hugging Face, OpenAI API, Google ADK), Vector Databases (Pinecone)

EDUCATION

- **M.S., Intelligent Communication Systems — UPIT, 2004**
- **B.Eng., Electronics — UPIT, 2002**
